

NodeJS and MongoDB Installation - Windows

NodeJS Installation

- 1) Visit the link www.carnegieapps.com/nodejs/nodejs.msi and a file will be downloaded
- 2) Go to the file and install it by double clicking on it

You have just installed NodeJS!

MongoDB Installation:

- 1) Right-click on My Computer
- 2) Go to properties
- 3) In the System section, check if you have a 32-bit Operating system or a 64-bit Operating System
- 4) For 32-bit operating system, visit www.mongodb.org/dr/downloads.mongodb.org/win32/mongodb-win32-i386-2.2.2.zip/download
For 64-bit operating system, visit www.carnegieapps.com/mongodb/mongodb64.zip
- 5) Extract the installed zip file onto your desktop and rename the folder mongodb
- 6) Open Run from the Start Menu, type in cmd and hit run (Command Prompt should open)
- 7) Type cd Desktop if you are not already in your Desktop directory
- 8) Type md data
- 9) Type md data\db
- 10) Check that you have the folder mongodb and data on your desktop

You have just set up MongoDB!

You are now ready to follow with the workshop
