NodeJS and MongoDB Installation - Linux

NodeJS Installation

1) Download node js src files from nodejs.org
2) Extract files into a folder
3) Run the following commands
   ./configure
   make
   sudo make install

You have just installed NodeJS!

MongoDB Installation:

1) follow the instructions on this page
   http://docs.mongodb.org/manual/tutorial/install-mongodb-on-ubuntu/

You have just set up MongoDB!

You are now ready to follow with the workshop

☺
